A) How To Start Off A Viral Empire	2
B) System Set Up	2
C) Ministers	3
D) Research	4
E) RE Shipyard	4
F) Stacking	5
G) Going To The Top With Viral	5
I) Infrastructure Research	5
J) Conclusion	6

## How To Start Off A Viral Empire

A lot of people believe that to start off a successful viral empire you need you're RE shipyard first. But, that is not true you should research all your ships first. Then, get upgrade system, destroy system, and minister's office (if you have less then 600 bill.). Next, you would need to explore to all your planets to level X. NOW YOU CAN GET YOUR RE FLEET! "Well now you set what I do now?" you may ask well it's simple just expand with a good stack (explained further in the guide). Also right now figure out what you're going to re once you get there.

## System Set Up

If you're going to go for top empires in pr you should have your systems like this

Titan level X (mission) - mining purposes and extra defense  
Orion level S (mission) – defensive purposes  
Dark level X – defensive purposes and food coverage  
Dark level X – defensive purposes and food coverage  
Dark level X – defensive purposes and food coverage  
Dark level X – defensive purposes and food coverage  
Dark level X – defensive purposes and food coverage  
Dark level X – defensive purposes and food coverage  
Eden level X – population purpose and main income

Titans should have around 30k planets  
Orion should have around 15k  
Darks should have around 15k  
Eden should have everything else

If not going high pr then this

Farm level X – food coverage  
Titan level X – poop bonus and mining

Farm should have around 10k planets maybe 5k depending on how many planets you have on Titan  
Titan should have everything else

## Ministers

Ministers are great bonuses you can have so you should have a couple of them. They cost a lot though but you'll find away such as mining ore on titan =).

If paid you should have your systems with these ministers (high pr).

Titan level X (mission) – mining mister with level 999 mining

Orion level S (mission) – not needed

Dark level X – not needed

Dark level X – food minister with level 999 farmer

Dark level X – food minister with level 999 farmer

Dark level X – food minister with level 999 farmer

Dark level X – food minister with level 999 farmer

Dark level X – food minister with level 999 farmer

Eden level X – tax minister with 999 tax collector and three level 10 military traits

If not paid you should have you systems with these ministers (high pr).

Titan level X (mission) – mining mister with level 999 mining

Orion level S (mission) – not needed

Dark level X – not needed

Dark level X – not needed

Dark level X – not needed

Dark level X – not needed

Dark level X – not needed

Dark level X – not needed

Eden level X – tax minister with 999 tax collector and three level 10 military traits

If paid you should have your systems with these ministers (low pr).

Farm level X - food minister with level 999 farmer

Titan level X (mission) - mining mister with level 999 mining also with a tax minister with 999 tax collector and three level 10 military traits

If not paid you should have your systems with these ministers (low pr).

Farm level X - food minister with level 999 farmer

Titan level X (mission) – mining and tax minister (I know a lot of money) with level 999 mining and 999 tax collector

## Research

You should have everything researched and all projects (unless your empire level is not high enough) completed right after you finished system set up so you're ready to go.

## RE Shipyard

And now we finally come to the RE Shipyard. I know there a lot to prepare up to this. Ok first get your RE shipyard is going to take hours. Trust me.

List of how to get the ships quick

- 1) Use strafez foddors large and small as buffers
- 2) Use strafez queens as buffers
- 3) Use strafez runner large and small as buffers
- 4) Attack bots for ships except livid
- 5) Once you hit them with recon figure out where your wanted ships are and put v. Borrelly in your stack where the target ship is  
EG: wanted ship in stack A  
Put v. Borrelly in stack A
- 6) Suicide them for max dam and max chance of capturing 5 ships
- 7) Once ships obtain RE ASAP

Now you have you RE shipyard.

If you are planning not to continue being paid use unreverse engineer project that comes with viral race and repeat the tips for RE.

Suggested fleet from ZGMFX10Afreedom

Marauder ships - Dominion, Shark, Fallen (in not paid change fallen and dominion to angel and hammerhead)

Terran ships – Hercules, Thor, Nirvana

Aspha miner ships – Lictor, aragonite, livid(r) (if not paid then get flysh)

## Stacking

Stack with viral is not hard because you have such good choice of good ships.

You should stack like this

High Hull Ratio  
High Hull Ratio  
Balanced Hull And Weapon Ratio  
Balanced Hull And Weapon Ratio  
High Weapon Ratio  
High Weapon Ratio

If someone stacks with high hull stack like this to destroy his fleet

High Weapon Ratio  
High Weapon Ratio  
Balanced Hull And Weapon Ratio  
Balanced Hull And Weapon Ratio  
High Hull Ratio  
High Hull Ratio

Stacking With ZGMFX10Afreedom suggested fleet

Cancer  
Fallen  
Lictor  
Dominion  
Shark  
Aragonite or Thor is you want first hit

## Going To The Top With Viral

You should explore the max of 500k planets then hit other people to climb.

You should have a lot of stored ore from mining on titan.

You should have a base power.

EG: base pr = 500 mill don't droop below this

Don't disband your fleet after every run or planets.

Research infrastructure research while in damage protection

## Infrastructure Research

Infrastructure research in really good for an empire so you should get a lot of it.

## Suggested infrastructure

Housing – everything else

Commercial – 0

Industry – 0

Agriculture – 0

Mining – 20

## Conclusion

ZGMFX10AFreedom wrote this guide. PM him if you have any questions on the guide on UC – RT.
